SUMMARY

Computer Science graduate with experience in application development, technical support, hardware/software troubleshooting, and database systems. I know how to use Python, Java, Kotlin, JavaScript, PHP, MySQL, SQLite, RESTful API concepts, Windows/Linux OS, and user support and most of MS applications. Built a POS inventory management application and administrative systems.

SKILLS

- **Languages:** Kotlin, Java, TypeScript, JavaScript, Python, PHP, HTML/CSS, SQL
- **Mobile:** Android (Jetpack Compose, Room, MVVM, CameraX, Google ML Kit, Android Studio, Gradle)
- **Web and Desktop:** React, Next.js, Tailwind CSS, Framer Motion, Node.js, Electron, Django, REST APIs, WebSockets/SSE
- **Databases:** PostgreSQL, SQLite, MySQL, Cloud Firestore
- **Testing:** Vitest, Jest, UI automation scripts (custom Node.js)
- **Cloud and Automation:** Cloudflare Workers, AWS, Zapier, n8n, Google Workspace, Microsoft Office
- **Systems and Support:** Windows and Linux deployment and configuration, hardware troubleshooting and repair, PC assembly, LAN and wired network diagnostics, Active Directory, application support, issue tracking, documentation
- **Practices:** Git/GitHub, Agile/Scrum, AI-assisted development (Claude, Gemini, Copilot, Cline)

PROJECTS

Mobile POS and Inventory System

01/2025 - 04/2026

Kotlin, Java, Room (SQLite), MVVM, XML, CameraX, Google ML Kit, MPAndroidChart, iText

[GitHub](#)

- Built and released an Android POS and inventory system for small retail stores.
- Implemented barcode checkout, inventory tracking, and transaction management using CameraX and Google ML Kit.
- Added sales analytics, sales forecasting, and restock recommendations with MPAndroidChart, plus PDF receipt generation.

Barangay Demo Portal

07/2023 - Present

Next.js 15, React 19, TypeScript, Tailwind CSS v4, Framer Motion, Cloudflare Workers (OpenNext)

[GitHub](#)

- Built and constantly updating a resident-facing portal for barangay services including document requests, incident reporting, request tracking, and an officials directory.
- Designed a responsive, accessible UI with reusable components, animated transitions, dark mode, reduced-motion support, and mobile navigation.
- Reduced served assets from 3.8 MB to 55 KB by converting images to WebP and eliminating web fonts.
- Added route protection and API-ready loading states to support integration with a future backend.

LAN Quiz System (Android and Desktop)

09/2026 - Present

Kotlin, Jetpack Compose, Electron, Node.js, TypeScript, WebSockets, PostgreSQL

[GitHub](#)

- Built an offline classroom quiz system where an Electron instructor app hosts a local WebSocket server and Android students join via QR code or 4-digit PIN.
- Implemented exam-integrity and reliability features including Android Lock Task Mode, WebSocket telemetry, heartbeat tracking, device identity recovery, and local answer persistence.
- Supported 8 question types with question randomization and server-side timer validation, verified through testing against a real server.

EXPERIENCE

Intern / Drainwiz Computer System

07/2025 - 08/2025

Echavez Street, Dipolog City, Philippines

- Collaborated with senior software engineers on a client web application build, fixing bugs and implementing database connections using HTML, CSS, JavaScript, and PHP to help bring the project to completion.
- Diagnosed and resolved hardware and software issues across company computers Windows and Linux, including OS installation, printer, and network equipment troubleshooting for client and internal systems.
- Worked alongside a two-person senior engineering team under close mentorship, gaining hands-on experience in real client-facing web development while balancing IT support responsibilities.

Help Desk Technician / Virtual Buddy

03/2022 - 05/2022

Minaog, Dipolog City, Philippines

- Provided technical and application support for customers and employees in a fast-paced call center environment, troubleshooting hardware, software, and system issues.
- Guided users step by step through issue resolution, communicating clearly with both technical and non-technical staff.
- Logged and tracked reported issues for technician follow-up and escalation, maintaining accurate records for documentation.

Freelance Developer / Web and System Applications

01/2023 - Present

Remote

- Rebuilt frontend components for a legacy School System and 2 barangay management systems across Mindanao, replacing outdated code with modern frameworks and techniques.
- Addressed recurring portal downtime and slow load times, resulting in noticeably faster performance and more stable, reliable uptime post-rebuild.
- Contributed to backend database integration by defining object and function naming conventions for REST API POST and GET endpoints to support frontend-database flow.
- Assisted in migrating legacy functions, methods, and UI designs from non-framework code into Node.js, React, Next.js and Django-based systems, ensuring existing functionality carried over correctly during the framework transition
- Collaborated with fellow freelancers and system stakeholders to scope requirements and prioritize fixes across the school system and 2 barangay systems.

EDUCATION

Bachelor of Science in Computer Science

08/2022 - 05/2026

Andres Bonifacio College

College Park, Dipolog City, Philippines

- **Relevant Coursework:** Software Engineering, Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Computer Networks, Web Engineering, Artificial Intelligence, Information Security.
